Education

PhD **City University of Hong Kong**, Department of Computer Science — *Kowloon, Hong Kong*, Sept 2025 – Present

- Supervisors: Prof. Zhichao Lu, Prof. Qingfu Zhang
- Research interests: Automated Scientific Discovery (LLM-guided Evolution, Multi-agent Systems), Brain-inspired Intelligence, Understanding Modern Neural Networks, Algorithm–Hardware Co-design

B.Eng **Tsinghua University**, Department of Electronic Engineering — *Beijing, China*, Sept 2020 – Jun 2025

- Major: Electronic Information Science and Technology
- Outstanding Undergraduate Thesis Award (top 5%)

Minor **Tsinghua University**, Department of Statistics and Data Science — *Beijing, China*, Sept 2023 – Jun 2024

- Minor degree in Statistics; completed all 10 required courses within one year

Entrepreneurship

BrainGalaxy Ltd., Co-founder & Chief Technology Officer (CTO) — *Shanghai, China*, Aug 2026 – Present

Brain-inspired AI for edge and embodied intelligence: full-stack co-design of brain-inspired algorithms and memristor-based compute-in-memory chips

- Lead the company's technology direction and the algorithm R&D division (application, model architecture, deployment, and software toolchain groups).
- Drive the "algorithm first, chip next" roadmap: low-power spiking and linear-attention models for on-device LLMs and robot vision, deployed first on mature edge SoCs, then co-designed with in-house memristor compute-in-memory chips.
- Bridge research and product, turning the team's brain-inspired architecture and memristor device research into the company's core technology.

Qingguang Innovation Technology Ltd., Lead Developer — *Beijing, China*, Jan 2024 – Oct 2025

AI-assisted smart glasses for the visually impaired; co-founders: Minh David Thao Chan, Shuo Wang

- Owned the end-to-end technical roadmap, from hardware integration to on-device algorithms, on an NVIDIA Jetson Orin Nano platform.
- Built an on-device assisted-navigation pipeline combining semantic segmentation, perspective transformation, and A* path planning, adapted from autonomous-driving methods.
- Selected for Tsinghua's 3rd iStar Program (top 11 teams university-wide); third prize, 2024 China-U.S. Young Maker Competition (Beijing Division).

Research Experience

Tsinghua University (THU), Research Assistant — *Beijing, China*
Advisors: Prof. Yali Li and Prof. Shengjin Wang — Sept 2024 – Jun 2025

- Studied continual lifelong learning with diffusion generative models; this work became my undergraduate thesis (Outstanding Undergraduate Thesis Award, top 5%).

City University of Hong Kong (CityU), Research Assistant — *Kowloon, Hong Kong*
Advisor: Prof. Zhichao Lu — Aug 2024 – Nov 2024

- Explored efficient brain-inspired architectures and non-backpropagation learning built on the brain's sparse, local, and dynamic computation.
- Proposed a parallel computing scheme for soft-reset LIF neurons that keeps richer neural dynamics, validated on spiking SSMs for long-sequence learning.

University of Illinois Urbana-Champaign (UIUC), Research Assistant — *Illinois, U.S. (remote)*
Advisor: Prof. Yu-Xiong Wang — Oct 2023 – Jan 2024

- Contributed to a unified diffusion-based framework that handles multi-modal data generation and dense visual perception together; ran experiments and curated training data.

National University of Singapore (NUS), Research Assistant — *Singapore*
Advisor: Prof. Wei Tsang Ooi — Aug 2023 – Nov 2023

- Explored Neural Radiance Fields for volumetric video representation, integrating NeRF fine-tuning with the LC-checkpoint algorithm to improve compression for streaming systems.

Tsinghua University (THU), Undergraduate Researcher (SRT Program) — *Beijing, China*
Advisor: Prof. He Tian — May 2022 – Sept 2022

- Graphene artificial throat: took part in device fabrication and vibration-signal acquisition, and built machine-learning models for speech pattern recognition from the vibration signals; project rated Grade A.

Selected Awards

Special Excellence Award, Dongguan Science Promotion Association	2025
Outstanding Undergraduate Thesis Award, Tsinghua Univ. (top 5%)	2025
Award for Outstanding Scientific and Technological Innovation, Tsinghua Univ.	2024
3rd iStar Program, Tsinghua Univ. (top 11 teams university-wide)	2024
Third Prize, China-U.S. Young Maker Competition (Beijing Division)	2024
Super Dream Award, Dongguan Science Promotion Association	2023
Zheng Gang Overseas Study Scholarship (4/250), Dept. EE, Tsinghua Univ.	2023
Tsinghua Univ. Awards for Social Work, Volunteer Service, and Fine Arts Excellence	2021 – 2022

Teaching

CS5491: Artificial Intelligence, Teaching Assistant — *Dept. CS, CityU*
Instructor: Prof. Zhichao Lu — Fall 2026

- Ran tutorials and lab sessions on AI concepts and Python implementations; graded assignments and exams.

40231212: Design and Practice of Intelligent Robots, Teaching Assistant — *Dept. EE, THU*
Instructors: Prof. Miling Zhang and Prof. Yueqi Duan — Fall 2024, Spring 2025

- Designed the experiments and teaching materials for the "Path Planning" module; guided students and assessed lab work.
